WRITTEN EX PARTE

October 2, 2002

Ms Marlene H. Dortch
Secretary
Federal Communications Commission
The Portals
445 12th Street, S.W.
Washington, D.C. 20554

Re: CC Docket No. 92-105

Dear Ms. Dortch:

Attached is the Second 911 Dialing First Transition Report of BellSouth Corporation, as required by Commission Order under Docket 92-105. The report covers the geographic areas served by BellSouth within the states of Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee. All counties in the state of Florida and North Carolina have implemented either basic 911 or enhanced 911, therefore, no technical or routing translations had to be implemented in these two states.

In addition to the Counties the Commission included in Appendix D of its Order released on December 11, 2001 in Docket 92-105, FCC 01-351, BellSouth has listed additional counties that had partial 911 coverage that were not identified by NENA. The information about these counties appears in boldface on the report by state.

BellSouth has begun delivering all 911 calls that enter the BellSouth network to either a designated PSAP or to an appropriate local emergency authority in 63 of the 66 Counties listed. Therefore, with the exception of three counties, BellSouth has completed the necessary technical and routing elements in transitioning and delivering 911 dialed calls in all other counties throughout its nine state region. BellSouth had been unable to identify the appropriate local

emergency authority in Perry County, Alabama, Catahoula Parish and Red River Parish in Louisiana. These three counties are shown in red on the report.

BellSouth was unable to secure agreement from Perry County in Alabama on where to begin transferring 911 dialed emergency calls to within the County. BellSouth has made numerous attempts and has sent registered mail to the Chairman of the County Commissioner's office and the Mayor of Marion County with no response to our request. BellSouth has also encountered difficulties in Catahoula Parish and Red River Parish in the state of Louisiana in securing their approval or agreement to send these parishes any 9-1-1 dialed calls.

Therefore, BellSouth has begun the process of contacting the Governors of Alabama and Louisiana for assistance in designating an entity before BellSouth proceeds to select an answering point as required by section 3(b) of the Act. To the extent that BellSouth continues to experience problems in identifying who the designated entity, once contact with the Governors' offices are complete, BellSouth will proceed as prescribed in the Commission's Order to select an appropriate local emergency authority. BellSouth will advise the Commission of the status of these three counties no later than October 25, 2002.

Please call me if, after reviewing this report, you have any questions.

Sincerely,

A handwritten signature in cursive script, reading "Kathleen B. Levitz".

Kathleen B. Levitz
